Dear Sir,

Choosing SSN was definitely the best decision for my under graduation. SSN is undoubtedly one of the top colleges in the country that provides quality education, opportunities and values to its students.

My life at SSN, particularly at the Department of Civil Engineering, has been really memorable. Faculty members ensure that students are guided and motivated to excel in the subjects both theoretically and practically. The department has always provided students with a bundle of opportunities like seminars, guest lectures, projects fully funded by the management, internships and placements. We were also able to work under the guidance of industry experts and civil engineering companies for our projects.

At the department, I have held positions like General Secretary of Institution of Civil Engineers (UK) Student Chapter and Placement Coordinator for my batch. These experiences aided in improving my communication, leadership and team building skills which further helped me during my placements. As the institution gives equal importance to extracurricular activities, I was able to be a part of the Classical Dance Team - Arudhra where I could learn and improve more.

SSN, as an institution, not only provides quality education but also recognizes the talent and potential of the students and nurtures them to face the professional life ahead with a proud smile.
