A One Day Workshop On

RECENT TRENDS IN COMPUTING RESEARCH
Exploring the Cutting Edge: Discover the Latest Innovations and Applications

About the Workshop

The aim is to raise awareness about some of the technologies in the domain of computing and information technology. This includes optimizing algorithms and looking at novel applications. The primary focus is to create an awareness of improved Artificial Intelligence, Machine Learning and Deep Learning capabilities. This workshop explores new possibilities through emerging technologies, such as Blockchain, IoT, Speech Technology, Cybersecurity, Computer Vision, Natural Language Processing and AR/VR. The implications of Quantum Computing in various fields is also discussed.

Payment - Rs. 200/-

Overview, Trends and Challenges

Artificial Intelligence	Quantum Computing
IoT Applications	Computer Vision
Blockchain	Speech Technology
Generative AI	Cybersecurity
Natural Language Processing	Augmented/ Virtual Reality

Target Audience

M.E. / M.Tech / M.S. (By Research) / M. Sc (CSE, IT) / M.C.A

Co-ordinators

Dr. N. Radha radhan@ssn.edu.in
Dr. S. Kavitha kavithas@ssn.edu.in
📞 +91 9944395452, +91 9444674502

Convenor

Dr. A. Shahina, Prof & HoD, IT
Dr. T.T. Mirnalinee, Prof & HoD, CSE

"Innovate, Integrate, Inspire"
